

Project Design Phase-II

Solution Requirements (Functional & Non-functional)

Functional Requirements:

Following are the functional requirements of the proposed solution.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

Date	15 August 2026
Project Name	Automated Network Request Management in ServiceNow
Maximum Marks	4 Marks

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Network Request Submission	Create a network request through the ServiceNow Catalog Item
FR-2	Request Information Capture	Capture requester, network type, source/destination details, business justification, and required date
FR-3	Request Validation & Approval	Validate submitted details and route the request to the appropriate approver
FR-4	Automated Request Processing	Automatically assign, update, track, and process approved network requests
FR-5	Notifications & Status Tracking	Send request notifications and provide status updates throughout the request lifecycle

NFR No.	Non-Functional Requirement	Description
NFR-1	Usability	Provide a simple and user-friendly ServiceNow catalog form for submitting and tracking network requests.
NFR-2	Security	Protect network request information using role-based access and authorized approval controls.
NFR-3	Reliability	Ensure consistent request creation, routing, assignment, updates, and notifications without data loss.
NFR-4	Performance	Process submissions, validations, approvals, and notifications within acceptable response times.
NFR-5	Availability	Keep the network request management service available for users and support teams with minimal downtime.

NFR No.	Non-Functional Requirement	Description
NFR-6	Scalability	Support increasing numbers of users and network requests without major changes to the solution.
